Assemble the Wick Broom in the order shown in the drawing. Glue joints with P.V.C. cement as directed on P.V.C. cement containers.

Item 3: 3/4" P.V.C. pipe to male threads - The preferred fitting for Item 3a is a 3/4" P.V.C. pipe to male hose threads. If this fitting is used, no hose washers (Item 9) are required. These may be available locally or from Nylon Inc. (see below). If standard pipe threads are used for 3a, it is essential to use hose washers (Item 9) in order to get a good seal around the grommets. These components are available from local hardware stores.

The following is a list of suppliers for hand held rope-wick components. It is by no means complete. Omission of any suppliers is purely unintentional. Inclusion of suppliers does not mean MCES endorsement.
